```

```
php artisan migrate php artisan debugbar:enable php artisan ide-helper:generate php artisan ide-helper:models --write php artisan permissions:show php artisan backup:run php artisan activitylog:clean
```

Health

```
composer require spatie/laravel-health php artisan vendor:publish --tag="health-config" php artisan vendor:publish --tag="health-views" php artisan vendor:publish --tag="health-translations"
```

composer require beyondcode/laravel-query-detector --dev php artisan vendor:publish --provider="BeyondCode\QueryDetector\QueryDetectorServiceProvider" Zaključak: Koristimo Blade Starter Kit (Bootstrap 5) jer je brži i lakši za integraciju u ovaj projekt. ☐ Ako klijent traži prebacivanje na Tailwind u budućnosti, možemo razmotriti Flux UI kao opciju.

☐ Slažeš li se s ovim ili želiš da još istražimo alternative? ☐

☐♂ YouGolfTours Platform

Welcome to the YouGolfTours project! This application is built using Laravel 12 with Livewire 3, Bootstrap 5, and a variety of Laravel packages to streamline travel package management, inquiries, and automated offer generation.

☐ Technologies Used

☐☐ Installation Instructions

☐☐ Clone the Repository

```
git clone https://github.com/your-repo/yougolftours.git  
cd yougolftours
```

☐☐ Install Dependencies

```
composer install  
npm install  
npm run build
```

☐☐ Environment Configuration

```
cp .env.example .env  
php artisan key:generate
```

☐☐ Database Setup

```
php artisan migrate --seed
```

☐☐ Authentication & User Roles

```
composer require spatie/laravel-permission  
php artisan vendor:publish --provider="Spatie\Permission\PermissionServiceProvider"  
php artisan migrate
```

⚡ Livewire & Bootstrap Setup

```
composer require livewire/livewire
npm install bootstrap@5
npm run dev
```

PDF Generation & Backup System

```
composer require spatie/laravel-pdf spatie/laravel-backup
php artisan vendor:publish --tag="backup-config"
```

Debugging & Log Viewer

```
composer require barryvdh/laravel-debugbar --dev
composer require barryvdh/laravel-ide-helper --dev
php artisan vendor:publish --tag=debugbar-config
```

Running the Application

```
php artisan serve
npm run dev
```

Features Overview

- **User Authentication & Role Management** (Admin, Agent, Client)
- **CRUD for Travel Packages & Inquiries**
- **Automated Inquiry Handling & PDF Offer Generation**
- **Direct Email Communication & Inquiry Tracking**
- **Hotel & Airline Management**
- **Dashboard with Analytics & Logging**
- **Bootstrap 5 UI with Livewire 3 Components**

Project Roadmap

See [Timeline.md](#) for the full project roadmap!
