# Sadržaj

domain : <https://demo.mellon.hr/> SSL - Let's Encrypt

web srv: nginx-apache2-php-fpm

- php 8.0.11
- node 14.17.6
- https, http2
- 30min timeout

database:

db - mysql Ver 15.1 Distrib 10.6.4-MariaDB, for Linux (x86\_64) using readline 5.1

<https://srv.mellon-dev.com:2087/pma/>

phpmyadmin login:

- username : mellon
- password : Mellon2021??!!

db login details :

- databse : mellon\_demo
- username - mellon\_demo
- password - Mellon2021??!!

laravel Install:

- composer create-project laravel/laravel your-application-name

If not having web server configured:

- cd your-application-nam
- php artisan serve

laravel Fortify:

- <https://github.com/laravel/fortify>
- <https://laravel.com/docs/8.x/fortify>

fortify setup and publish

- composer require laravel/fortify
- php artisan vendor:publish --provider="Laravel\Fortify\FortifyServiceProvider"

Make sure that you are registering the service providers in config/app.php:

- App\Providers\FortifyServiceProvider::class,

application setup: .env - database setup php artisan migrate

frontend scaffolding:

- npm i bootstrap@latest popper.js sass sass-loader --save-dev
- bootstrap@5.1.3
- popper.js@1.16.1
- sass-loader@12.3.0
- sass@1.43.5

mail config:

- .env - mail server postavke + portovi (SSL) Laravel packages :
- <https://github.com/barryvdh/laravel-debugbar> - debugbar - not working with php 8.0.11
- <https://github.com/barryvdh/laravel-ide-helper> - IDE helper PHPStorm and VSCode
- <https://github.com/beyondcode/laravel-query-detector> - N+1 Query detector

Debugbar PHP 8.0.11 fix :

- composer require psr/log:^1.0

laravel debug and optimization:

- <https://stackoverflow.com/a/37535377>
