Error: EACCES: permission denied, mkdir '/usr/local/lib/node_modules/node-sass/build' Ask Question
Solution :-

You need to change ownership of node_modules, because you use sudo npm install -g node-sass so its ownership set to root,

To change ownership to current user as group -

```
sudo chown -R root:YOUR_USERNAME /usr/local/lib/node_modules/ sudo chmod -R 775 /usr/local/lib/node_modules/
```

!!755!!

And never use sudo for npm related query.

ubuntu server

First sudo chown -R \$USER /usr/local

And cd /path/of/project chmod -R a+x node_modules npm run watch

If not work npm rebuild npm run watch

If not work rm -Rf node_modules npm install npm run watch

chmod -R u+x node_modules
