

# Sadržaj

`sudo hostnamectl set-hostname fvision.digital`

`134.122.66.188/20`

`http://134.122.66.188:10000/`

`sudo nano /etc/hostname`

`sudo nano /etc/hosts`

`sudo ufw allow 10000`

`sudo apt update`

`sudo apt install python apt-show-versions libapt-pkg-perl libauthen-pam-perl libio-pty-perl libnet-ssleay-perl curl cd /tmp && curl -L -O http://www.webmin.com/download/deb/webmin-current.deb`

`sudo apt install ./webmin-current.deb`

`curl -O http://software.virtualmin.com/gpl/scripts/install.sh`

`sudo chmod +x install.sh`

`sudo ./install.sh`

initial install, post config virtualmin ssl install onda upaliti ssl

`c ssl=0 session=0`

ssl na webminu cloud flare dns only, bind upaljen

dns records za mail https i ssl -> ne spam
